

From: Chester Kennedy, VP Simulation Lockheed Martin Inc.

Pretty cool when a *real* President sits in your seat!

“ It is cool!... it’s been a great experience for us too... as I travel around and see more of the chairs showing up in places like Akron and Ft with etc, I have to smile and even laugh about the simplicity too... they call them Chester Chairs because I pushed it when several folks laughed at me too...mostly behind my back... but we take the same equipment and sit it up on a table and it’s like the reaction is “that works” ... put the same stuff around a hot seat and the line forms out the door... when I walked in the gate at Sawgrass and asked a PGA official where the LM tent was, his first response was, hey if you know anyone over there that might get me a ride in that sim

... and from the make a wish kids(awesome experience in itself) thru the vets thru George 41, the line yesterday never stopped... it’s a powerful combination... the F-35 and a hot seat... got to love it... “

Take care... stay in touch... I’ll try to get you some video of George in the seat
